

throughout his entire career, tended to assume that a statistical relationship implied causality. The phenomena that he chose to compare often reflected the values and moral outlook of his social class.”

Professor Grob’s text is supported by an abundance of well-arranged notes, and he has provided the reader with a list of Jarvis’ published writings. The physical aspects of the book reflect a good design and attractive typography by the University of Tennessee Press. Librarians will be happy to learn that it is printed on stock designed to endure 300 years.

WILLIAM B. OBER, M.D.

Erratum

In the December 1979 issue, page 1256, the title of Table II should read BIOLOGICAL EFFECTS OBSERVED IN HUMAN AND NONHUMAN BIOTA FROM EXPOSURE TO MICROWAVES OR RADIOFREQUENCY RADIATION. Table III is a continuation of Table II, and under the column headed *Biota* the word “human” should be inserted in all blank spaces.
